 FUNDUSZ SPOŁECZNY

Course title		ECTS code	
The molecular basis of the amyloidogenic diseases		13.3.1226	
Name of unit administrating study			
null			
Studies			
faculty	field of study	type	second tier studies (MA)
Faculty of Chemistry	Chemical Business	form	full-time
		specialty	all
		specialization	all
Faculty of Chemistry	Chemistry	type	second tier studies (MA)
		form	full-time
		specialty	all
Faculty of Chemistry	Environmental Protection	specialization	all
		type	second tier studies (MA)
		form	full-time
		specialty	all
		specialization	all
Teaching staff			
prof. dr hab. Sylwia Rodziewicz-Motowidło; dr hab. Aneta Szymańska, profesor uczelni			
Forms of classes, the realization and number of hours		ECTS credits	
Forms of classes		2 classes - 15 h tutorial classes - 15 h student's own class - 20 h TOTAL: 50 h - 2 ECTS	
Lecture			
The realization of activities			
classroom instruction			
Number of hours			
Lecture: 15 hours			
The academic cycle			
2023/2024 winter semester			
Type of course		Language of instruction	
an elective course		english	
Teaching methods		Form and method of assessment and basic criteria for evaluation or examination requirements	
Lecture with multimedia presentation of basic issues in the drug discovery process		Final evaluation	
		Graded credit	
		Assessment methods	
		- participation in classes, - a multimedia presentation prepared (optionally in groups of several people): its content (factual correctness of the presented information) and the manner of presentation (clarity and clarity).	
		The basic criteria for evaluation	
		Performance of presentation (The topics will be prepared by the academic teacher), positive note from presentation. Assessment criteria in accordance with the University of Gdansk Study Regulations.	
Method of verifying required learning outcomes			
Required courses and introductory requirements			
A. Formal requirements			
lack			
B. Prerequisites			

<p>– knowledge of basic issues in the field of organic chemistry: functional groups occurring in organic compounds, structure of amino acids, peptides and proteins, influence of external factors on conformational changes of peptides and proteins, knowledge of basic physico-chemical techniques used in peptide and protein chemistry</p>	
<p>Aims of education</p> <ul style="list-style-type: none"> - To acquaint students with the definition of amyloid and its formation - To acquaint students with information on the mechanisms of amyloid fibril formation - To acquaint students with physico-chemical techniques used in research on amyloid fibrils - The role of amyloid fibrils in the development of amyloid diseases - Make students aware of the importance of environmental factors in the development of amyloid diseases 	
<p>Course contents</p> <p>The lecture will cover the following issues: classification of amyloidogenic diseases; structure of amyloid fibril; folding of amyloid proteins; the role of post-translational modifications in the formation of amyloid fibrils; the role of lipid modulators in the formation of amyloid; the mechanism of formation of amyloid fibrils; amyloidogenic proteins, structure and function (eg. b-amyloid, prion protein, immunoglobulin, transthyretin, gelsolin, lysozyme, fibrynogen, b-microglobulin, cystatin C, amyloid-forming hormones), amyloid diseases (amyloidosis).</p>	
<p>Bibliography of literature</p> <p>Literature required to pass the course Monographic materials provided by the teacher Scientific texts indicated by the teacher</p> <p>Extracurricular readings</p> <ol style="list-style-type: none"> 1. Amyloid, prions and other protein aggregates / ed. By Ronald Wetzel. Methods in Enzymology vol. 309, San Diego, Calif.,: Academic Press, cop. 1999 2. Protein misfolding diseases: current and emerging principles and therapies / ed. By Marina Ramirez-Alvarado, Jeffrey W. Kelly, Christopher M. Dobson, Wiley Series in Protein and Peptide Science, Hoboken: Wiley, A. John Wiley & Sons, cop. 2010 3. Studies of human plasma amyloid A protein fibrillization and its short N-terminal fragments / Marta Sosnowska; University of Gdansk. Faculty of Chemistry. Sosnowska, Marta (biochemistry). PhD thesis, Gdańsk, 2015 4. Amyloid structure, function, and molecular mechanisms. Fri. 2 / guest eds .: Sheena Radford and Jonathan Weissman., JMB Journal of Molecular Biology, vol. 421, iss. 4/5, Amsterdam [etc.]: Elsevier, 2012. 5. Amyloid structure, function, and molecular mechanisms. Fri. 1 / guest eds .: Shenna Radford and Jonathan Weissman. JMB Journal of Molecular Biology, vol. 421, iss. 2/3, Amsterdam [etc.]: Elsevier, 2012. 6. Characterization of the complex of human cystatin C (hCC) with serum amyloid A protein (SAA) / Marta Spodzieja; University of Gdansk. The chemistry department. Department of Medical Chemistry Spodzieja, Marta Marcelina. PhD thesis, Gdańsk 2011. 7. Synthesis, studies of conformation and aggregation of β-amyloid peptides / Paulina Juszczuk. Juszczuk, Paulina. PhD thesis, Gdańsk 2005. 8. Research on β-amyloid peptide and its fragments / Kornelia Wiśniewska. Wiśniewska, Kornelia. PhD thesis, Gdańsk 2003. 	
<p>The learning outcomes (for the field of study and specialization)</p> <p>Chemistry:</p> <p>K_W05: has extended knowledge in the field of the specialization studied</p> <p>K_W11: demonstrates in-depth knowledge about the current trends in the development of chemistry as a science and the latest discoveries in this field</p> <p>K_U04: applies acquired knowledge of chemistry and related scientific disciplines</p> <p>K_U10: reads with understanding scientific and popular science chemical texts in English</p> <p>K_K05: understands the need for independent search of information in scientific literature and popular science magazines</p> <p>Chemical Business:</p> <p>K_BChII_W01: knows and understands in-depth complex physicochemical processes and is able to analyse their course in connection with other fields of science</p> <p>K_BChII_U03: is able to present, based on the current state of knowledge, scientific discoveries and the results of own research in the field of chemical and economic sciences, through skilful debate and public speeches</p> <p>K_BChII_K03: is willing to critically assess the level of</p>	<p>Knowledge</p> <p>Student:</p> <ul style="list-style-type: none"> - knows the mechanisms of the formation of amyloid fibrils - knows the structure of various amyloid fibrils - knows the causes of amyloid diseases at the molecular level
	<p>Skills</p> <p>Student:</p> <ul style="list-style-type: none"> - uses the acquired knowledge about the molecular basis of the formation of amyloid diseases.
	<p>Social competence</p> <p>Student:</p> <ul style="list-style-type: none"> - understands the role of environmental factors in the development of amyloid diseases and the importance of appropriate pro-health behaviors in reducing the risk of amyloidosis - knows how to work in a group

<p>his/her own knowledge in the light of the achievements of the studied scientific discipline</p> <p>K_BChII_K09: is willing to conduct research and develop his/her scientific and creative achievements in the studied field</p> <p>Environmental Protection:</p> <p>K_OŚII_W01: describes in an in-depth manner complex phenomena and processes occurring in nature, including those related to the spread of anthropogenic pollution</p> <p>K_OŚII_U06: defines her/his interests and develops them within the chosen specialisation and themes of her/his master's thesis while implementing the process of self-education and planning of own future career</p> <p>K_OŚII_K05: critically assesses her/his own knowledge and the knowledge of the teams in which s/he works, can critically assess the content received</p>
