<p>Business Chemistry: The method of verifying the acquisition of knowledge: Assessment of correctness of answers to questions covering subject issues (K_BChII_W02, K_BChII_W08). Assessment of the correct use of engineering terminology, the correctness of creating 3D models. Assessment of the ability to indicate tools included in the software, with the help of which the student is able to achieve the assumed goal (K_BChII_U04, K_BChII_U08). Assessment of the independence of looking for a path as soon as possible and the least energy-consuming solution of an engineering task, independence in planning the sequence of execution of individual elements of the project. Assessment of the ability to cooperate with other group members during the implementation of group tasks. Assessment of the student's compliance with the rules of work at a computer station (K_BChII_K03, K_BChII_K04).</p> <p>Chemistry: The method of verifying the acquisition of knowledge: Assessment of correctness of answers to questions covering subject issues (K_W05, K_W10).
